

ING Bank Kahramanmaraş IT & Operational Building, 2013

ING Bank IT & Operational Center is located at the Organized Industrial Zone in the eastern Anatolian province of Kahramanmaraş. The 4.500 m² project was designed with sustainability principles while combining aesthetics with the high technological demands of a data center. The design has already become a local landmark attracting young talent to work at the facilities. The data center and call center brought jobs to 600 local people. The construction consists of two parts: an "Operational Center" and a "Call Center" that will employ 600 people.

The project is designed as three blocks: The office block comprises two functional floors having a total area of 2.400 m². In this section are the Data Center, Call Center, Operational Center and meeting rooms. In the monumental transparent glass block which is the entrance block are the dining hall, leisure and entertainment areas, sports center as well as the building's administrative sections distributed over 3 floors. The first two blocks were built during the first phase of construction, immediately followed by the third block with an additional 2.400 m².
