

Arasta Building Products Center And Office Building, 2000

With the purpose of the showing and selling of building products under one roof ARASTA includes sales and exhibition areas of various sizes. The total land area is 13.800 m² and the construction area is to be 52.000 m². 20.000 m² to be designated for shops and 17.000 m² for the offices.

The majority of office buildings in Istanbul are constructed allowing for under 1.000 m² per floor. Considering the demand for offices with larger area, each floor of ARASTA offices is in excess of 1.000 m² enabling fewer floors to be built, retaining the overall feeling of a business park while reducing fear of possible earthquake.
