

Automobile Showroom and Services Building,1994

This complex, designed for one of the marketing companies of the largest automobile manufacturer of Turkey, TOFAS, has a total of 10.000 m² of area which includes a show-room, an administration building, a service building and a main spare parts storage building. To secure the exhibition of the cars in a continuous space with a large span, the steel roof slab of the show-room is hung with steel bars to a single reinforced concrete pillar. This suspension system, visible from the outside is made even more distinct by the use of a transparent facade giving a free-standing effect.
